

Kong May Capsules

The All-Natural Miracle Adjuster of Hyperlipidemia

If you are trying to get the effect of a safe, natural herbal supplement to decrease your cholesterol by try the safe and effective herbal supplement "Kong May", it's your best choice. See the result of your blood report improve after taking three bottles of Kong May.

Kong May is for you if you suffer from:

- ⊙ High cholesterol
- ⊙ High blood pressure
- ⊙ Diabetes
- ⊙ Being overweight
- ⊙ Heavy drinking or alcoholism
- ⊙ Unmanageable and stress
- ⊙ Unhealthy eating habits

Functions:

- ⊙ Adjusts Hyperlipidemia (high cholesterol)
- ⊙ Keeps blood vessels elastic and blood free of toxins
- ⊙ Prevents atherosclerosis or cerebrovasculariasis and cardiovasuclariasis

Dosages:

Two to three capsules twice daily after breakfast and dinner

Composition:

Antrodia Camphorata Mycelium (Antrodia Camphorata is a Taiwan-unique fungus which grows on the walls inside the core of decayed Cinnamomum Kanehirae, also known as Zhang Nei mushroom, Niu Zhang Zhi, Niu Zhang. Antrodia Camphorata provides many bioactive substances and it is cultivated mainly via mycelium), Bacillus Subtilis (Natto Powder), Cordyceps Sinensis, Monascus Purpureus, Crataegus Pinnatifida (Shan Zha), Chitosan, Salvia Mmiltiorrhiza (Dan Shen), Gynostemma Pentaphyllum (Jiao Gu Lan).

An experimental demonstration of Kong May:

Shown below is the internal membranes of a hyperlipidemic rabbit's artery before and after given Kong May. The hyperlipidemia set of the rabbit's artery is arranged abnormally because the mediator SMCS of artery internal membranes meets with the IEP breakage. The artery conformational change in which the rabbit was given Kong May is shown to be much healthier.

The All-Natural Miracle Adjuster of Hyperlipidemia

In our modern society, the average person lack of exercise, bad eating habits, and undergoes the daily stresses, these often lead to health problems that result from which can be the main reason for the common diagnosis of hyperlipidemia (high cholesterol). Most people feel normal at the stages of sub-clinical or middle-high levels of lipemia, but these eventually lead to the processes of atherosclerosis, cerebrovasculariasis, cardiovasculariasis, hypertonia, apoplexy, hemiplegia, etc. We call this the "chronic invisible killer".

Normal lipemia levels are a cholesterol total <200mg/dL; LDL calculated colesterol<130mg/dL; HDL Cholesterol >= 40 mg/dL; Triglycerides <150mg/dL. If lipemia continues to be at abnormal levels, it will cause arterial damage and provoke a series of cerebrovasculariasis, cardiovasculariasis, normal intravascular membrane coverings with one layer of smooth endothelial cells, with lipemia increasing, the endothelial cells will corrode and the LDL cholesterol lipid seizes the opportunity to intrude into the endothelial cells, accumulating lipemia after phagocyte

phagocytose lipids and alternating to form foamy cells that characterize spots of atherosclerosis and coagulate huge amounts of collagen fiber and shell of cells, endothelial cells of artery excrescent hyperplasia, it's will form the atherosclerosis spots make the lumen of arterial narrow even completely

block, damage of ischemic and provoke corresponsive illness, such as coronary occlusion from atherosclerosis, lightly cause angina pectoris, grievous will cause myocardial infarction and endanger life. Because of brain artery narrow, chronic cerebral ischemia will generate senile dementia; cerebral artery rend will cause cerebral hemorrhage and generate hemiplegia even die. Kidney arteriosclerosis generates kidney hyperpresia and ultimately kidney failure.

If you are trying to get the effect of a safe, natural herb to decrease your cholesterol, the product "Kong May" is your number one choice. Kong May's main ingredient is Antrodia Comphorate, also known as "Niu Zhang Zhi, Niu Zhang mushroom, or Zhang Nei mushroom," etc. This characteristic fungus of Taiwan is known to be detoxifying and liver nourishing. The anticancer herbal remedy "Cordycep Sinensis" is a special and precious Chinese Medicine, It's composed of parasitic fungus in larva, primarily containing polysaccharides, 19 amino acids, and 17 inorganic elements, which can balance blood pressure. "Monascus Purpureus" has been used as a food and medicine for thousands of years. Over 60 strains can be used as dietary purposes. After fermentation among 160 strains, the metabolites were identified as the best anti-cholesterol and anti-lipidemic agents. "Crataegus Pinnatifida" also called Shanzha or Hawthorn fruit is used to stimulate digestion and promote the functional activity of the intestines to improve the normal Qi and dissipate blood stasis. "Chitosan" is the combination of cholic acid with Cholate and restrains the small intestine absorption of cholesterol. These all-natural, powerful components produce no side effects and do not contain any chemical ingredients.
